EXPERIENCE

Software Engineer

Embarckle

📅 May 2022 – Present

📍 Coimbatore , Tamil Nadu

- Designed a React JS application where the admin was allowed to change the contents on the website, add the tip of the day, upload new images, and a lot more.
- Progress on requirement analysis and functional design.
- Coordinate with IT groups and external vendors and ensure effective application services to ensure the reliability of all applications.
- Monitor and provide support to workflows and provide expert knowledge on all workflow designs.
- Implementation of tasks with the best practices and quality standards.
- Maintain code quality by overiewing it and merging the changes in the GIT repository.
- Maintain code quality by overiewing it and merging the changes in the GIT repository.
- Technology React Js , Typescript , Redux.

Software Developer Trainee

Eceis Broker Price Opinion

📅 July 2021 - March 2022

📍 Trivandrum, Kerala

- Design a robust UI design as per the requirements modules for machine learning algorithms.
- Get the prediction data from the RESTApi's and display the actual prediction in the different charts.
- Reviewing code changes to maintain code quality
- Technology React Js , Mobx.

PROJECTS

Dynamic Attack Detection and Mitigation in IoT using SDN

Exploratory Project

📅 July 2018 – April 2021

- Software based system which is capable to detect and mitigate DoS and DDoS attack in early stages using SDN and without putting much burdens on the IoT devices.
- Technology : Python and IoT

E-Learning App

Self - learning

📅 2018 – November 2018

- software based system that contain different courses for users and related quizzes.
- Technology : Android

EDUCATION

Amrita Vishwa Vidyapeetham

Master of Computer Application

📅 July 2019–July 2021 📍 Kollam , Kerala

CGPA:7.81

SMT Kashibai Navale College

Bachelor of Computer Application

📅 July 2016–June 2019 📍 Pune , Maharashtra

Percentage : 63

SKILLS

- Language : JavaScript, HTML5 CSS3
- Frameworks : React
- Databases : MySQL (Beginner Level)
- VCS : Git

PUBLICATION

IEEE (ICIRCA-2021)

- An SDN-Based Prototype for Dynamic Detection and Mitigation of DoS Attacks in IoT.

CERTIFICATIONS

- Introduction to Programming Using Python - Cousera.
- AWS Solutions Architect - Associate Level - Simplilearn.
